Products need labeling

Label printers
for industrial applications

a**8⁺, **XD**4T, **XC

Made in Germany

Label printers for industrial applications

They fit with a wide range of applications.

They have been developed with focus
on easy and convenient operation and high reliability.

The print mechanics and the chassis are made of high-quality
materials and perfectly match in terms of shape and function.

A large number of peripherals and software
enable customer-specific solutions.

Whether they are operated in stand-alone mode,
in a PC application or within a network – the rugged
A8+ printers and the **X series** are always up to the mark.

Sample applications

Label printer XD4T
Double-sided printing, for example
textile labels, shrink tubes and continuous materials

Label printers XC4, XC6
Two-color printing, for example warning labels compliant to GHS

Label printer A8+
Cardboard and pallet labels up to A4 format
Label printer A8+, the extra-wide one

For pallet and drum labels up to a width of A4

Label printer		A8+
Printable resolution	dpi	300
Print speed	up to mm/s	150
Print width	up to mm	216

Details

❶ Large graphic display
White backlight provides good readability.

❷ Ribbon holder
The three-part tightening axles enable the ribbon
to be quickly and easily exchanged.

❸ Simple adjustment
The print head is pressed on by three plungers:
One is fixed at the inner side, another is set in centered position
and the third is set at the outer label margin.

❹ Periphery connection
Additional modules are quick and easy to connect.
All peripheral devices are plugged to the printer
with the help of two pins and are fixed with a screw.

❺ Rugged metal chassis
made of cast aluminum. Basis to assemble all the units

❻ Roll holder
picking up core diameters of at least 38 mm
(76 mm adapters for a better label winding are included
in the delivery). The spring-mounted margin stop
with a screw cap enables constant tension during material feed
and therefore improves the accuracy of the imprint.

Label printer XD4T for double-sided printing

1.2

It prints on both sides of textile tapes, cardboard labels, pressed tubes continuous or ready-for-use, as well as on endless materials made of plastic, paper or cardboard. The ribbon separates from the materials with the help of a draw roller that also improves the accuracy of the imprint.

No print head adjustment necessary with different material widths

Print rollers provided for slim and thin materials

Label printers		XD4T
Printable resolution	dpi	300
Print speed	up to mm/s	125
Print width	up to mm	105.6

Accessories

Cutter CU4

Paper labels, self-adhesive labels, cardboard, textile and plastic materials as well as shrink tubes can be cut.
Perforation cutter PCU4

In addition, the materials can be perforated before they are manually separated.

Stacker ST4 M with cutter

The printed materials are cut and stacked.
If the maximum stack height is reached, printing is interrupted.
Even stiff or curved materials can be processed.
We recommend to have these applications tested at our premise.

Details

DR4-M25
DR4-M50
DR4-M80
DR4S

① Large graphic display

White backlight provides good readability.

② Ribbon holder

The three-part tightening axles enable the ribbon to be easily inserted. A preprinted ruler simplifies the adjustment.

③ Plungers

The print head is pressed on by two plungers. As the materials are centre-guided in the device, no print head setting or adjustment is necessary.

④ Antistatic brush

Particularly with plastic materials the electrostatic charge is discharged after printing.

⑤ Material guide

The material guide just in front of the print roller provides accurate imprint. The material width is adjusted with a spindle.

⑥ Periphery connection

Additional modules are quick and easy to connect. All peripheral devices are plugged to the printer with the help of two pins and are fixed with a screw.

⑦ Separator

primarily if continuous or textile materials as well as shrink tubes are processed. At high heat energy the ribbon can stick with the textile tape. A roller reliably separates the material from the ribbon.

⑧ Rugged metal chassis

made of cast aluminum. Basis to assemble all the units

⑨ Roll holder

picking up core diameters of at least 38 mm (76 mm adapters for a better label winding are included in the delivery). The material roll automatically centers when setting the margin stop. In case of core diameter 100 mm, an adapter is recommended.

⑩ Slim print rollers DR4-M

In order to achieve an accurate imprint with slim materials and ribbons, also slim print rollers are needed. These prevent from print roller wear, print head contamination and errors during material feed. Coating: synthetic rubber

⑪ Print roller DRS

It has an extra long service life at a higher imprint tolerance. Coating: silicone

Label printers XC for two-color printing

1.3

Two print units are arranged one behind the other to achieve simultaneous printing with two colors on one label.

Ribbon-saver mechanism on one print head

Compliant to the GHS regulations for classification and labeling

Picking up large label rolls with up to 300 mm diameter

Label printer		XC4
Printable resolution	dpi	300
Print speed	up to mm/s	125
Print width	up to mm	105.6

1.4

Label printer		XC6
Printable resolution	dpi	300
Print speed	up to mm/s	125
Print width	up to mm	162.6

We gladly assist you in the selection of proper ribbons.

Accessories

Cutter CU4
Paper labels, self-adhesive labels, cardboard, textile and plastic materials as well as shrink tubes can be cut.

Perforation cutter PCU4
In addition, the materials can be perforated before they are manually separated.
Stacker ST4 L with cutter
The printed materials are cut and stacked.
If the maximum stack height is reached, printing is interrupted.
Even stiff or curved materials can be processed.
We recommend to have these applications tested at our premise.

Common details

Label printer XC6

DR4S

1 Large graphic display
White backlight provides good readability.

2 Ribbon holder
The three-part tightening axles enable the ribbon
to be quickly and easily exchanged.

3 Plungers
One is fixed at the inner side. The second is adjusted that far
to the edge of the label until a good print image is ensured.

4 Antistatic brush
Particularly with plastic materials
the electrostatic charge is discharged after printing.

5 Periphery connection
Additional modules are quick and easy to connect.
All peripheral devices are plugged to the printer
with the help of two pins and are fixed with a screw.

6 Ribbon-saver mechanism on print head 1
to be used with labels that are only partially printed.
Within unprinted areas the print head is lifted
and the ribbons is stopped during label feed.

7 Rugged metal chassis
made of cast aluminum. Basis to assemble all the units

8 Roll holder
picking up label rolls up to 300 mm. With the help
of the swing lever and the integrated brake
labels are unwound with constant tension.

9 Fanfold guide
Fanfold labels are set behind the print unit.
The guide and the additional brake ensure
that they are safely fed to the print mechanics.

10 Print roller DRS
It has an extra long service life at a higher imprint tolerance.
Coating: silicone

Accessories - extra equipment, interfaces, connecting cable

Extra equipment		
2.3		**Print roller DR4-M25** Material width up to 25 mm Synthetic rubber coating for accurate imprint
		Print roller DR4-M50 Material widths 20 to 50 mm Synthetic rubber coating for accurate imprint
		Print roller DR4-M80 Material width up to 80 mm Synthetic rubber coating for accurate imprint
2.4		**Print roller DR4S** Material width up to 120 mm Silicone coating for an extra long service life at a higher imprint tolerance
2.5		**Label sensor** Reflective from top
2.6		**Adapter 100** to pick up label rolls with core diameter 100 mm and outside diameters larger than 180 mm
2.7		**Memory card** CompactFlash Typ I
2.8		**External operation panel** If the operation panel is no longer accessible after the printer has been installed in a plant, an external one can be additionally added. A slot to connect a CompactFlash memory card Type I as well as a host interface are provided.
2.9		**Pause adapter PS7** for printing in a reserve loop. The print job is stopped by the Pause signal. The label that is currently printed will be completed.

I/O interface

Inputs:	Outputs:
Pause	Print job missing
External errors	Printer not ready
	Printing started

Interfaces		
3.2		**RS422/RS485** 1,200 to 230,400 baud/8 bit
3.3		**Label selection – I/O box** Up to 16 labels per box can be selected from the memory card by a master control, e.g. PLC. Two boxes can be connected. The I/O box allows simple PLC control processes with four inputs and outputs each via abc programming.
3.4		**WLAN 802.11b/g**

Connecting cable		
4.1		**Connecting cable RS232C** 9/9 pin, length 3 m

Accessories - label cutting, perforating, stacking

Cutter CU

Paper labels, self-adhesive labels, cardboard, textile and plastic materials as well as shrink tubes can be cut.

Technical data		Cutter		
		CU4	CU6	CU8
To be used with		XD4T, XC4	XC6	A8+
Material Width	up to mm	110	180	232
Weight cardboard gr/m²		60 - 300		
Thickness	mm	0.05 - 0.8		
Cutting length	from mm	5		
Gap height	up to mm	2.5		
Cuts/min, without material up to		100		
Stop print job when		final cutter position not attained		

Perforation cutter PCU4

Continuous materials such as textiles or shrink tubes are perforated before they are manually separated. In addition, the materials can also be cut.

Technical data		Perforation cutter
		PCU4
To be used with		XD4T, XC4
Perforating Web distance	mm	0.5
Web width	mm	2.5 or 10
Material Width	up to mm	85
Weight cardboard gr/m²		60 - 300
Thickness	mm	0.05 - 0.8
Cutting length	from mm	5
Gap height	up to mm	2.5
Cuts/min, without material up to		100
Stop print job when		final cutter position not attained

Stacker ST4 with cutter

The printed materials are cut and stacked. If the maximum stack height is reached, printing is interrupted. Limitations may apply to stiff or curved materials. We recommend to have these materials tested at our premise.

Technical data		Stacker with cutter	
		ST4 L	ST4 M
To be used with		XC4	XD4T
Material Width	up to mm	20 - 110	20 - 100
Weight cardboard gr/m²		60 - 300	
Thickness	mm	0.05 - 0.8	
Cutting length	from mm	20 - 150	
Gap height	up to mm	1.2	
Cuts/min, without material up to		100	
Stop print job when		final cutter position not attained, stacker cover open, stack height attained	
Stack height	up to mm	100	

Support table - label W x H

The support table and the protective cover are adapted to the label size. They have to be ordered separately.

Accessories - label rewinding
External rewinders ER4/6/8 with built-in power supply units
To be used also with external printers. Label winding outside or inside

Technical data	External rewinder			
	ER4/210	ER4/300	ER6/300	ER8/300
To be used with	**XD4T, XC4**	**XD4T, XC4**	**XC6**	**A8+**
Material width up to mm	120	120	180	235
Roll diameter up to mm	205	300	300	300
Tightening axle mm for core diameter	76			
Winding	outside or inside			
Power supply	100 - 240 V, 50/60 Hz			
Adapter kit for				
ER8 with A8+				
ER4, ER6 with XC4, XC6				

Label software cablabel S3

Designing, printing, administrating

cablabel S3 opens up the full potential of cab devices.

First of all, the label must be designed. Only when it comes to printing it has to be decided whether the label shall be processed on a label printer, a print and apply or marker laser system. cablabel S3 is of a modular design which makes it adaptable to requirements step by step. To support functions like native JScript programming, elements such as the JScript Viewer are embedded as plug-ins. The designer user interface and the JScript code are synchronized in real time. Special functions like the Database Connector or barcode testers can be integrated. For further information see **www.cab.de/en/cablabel**
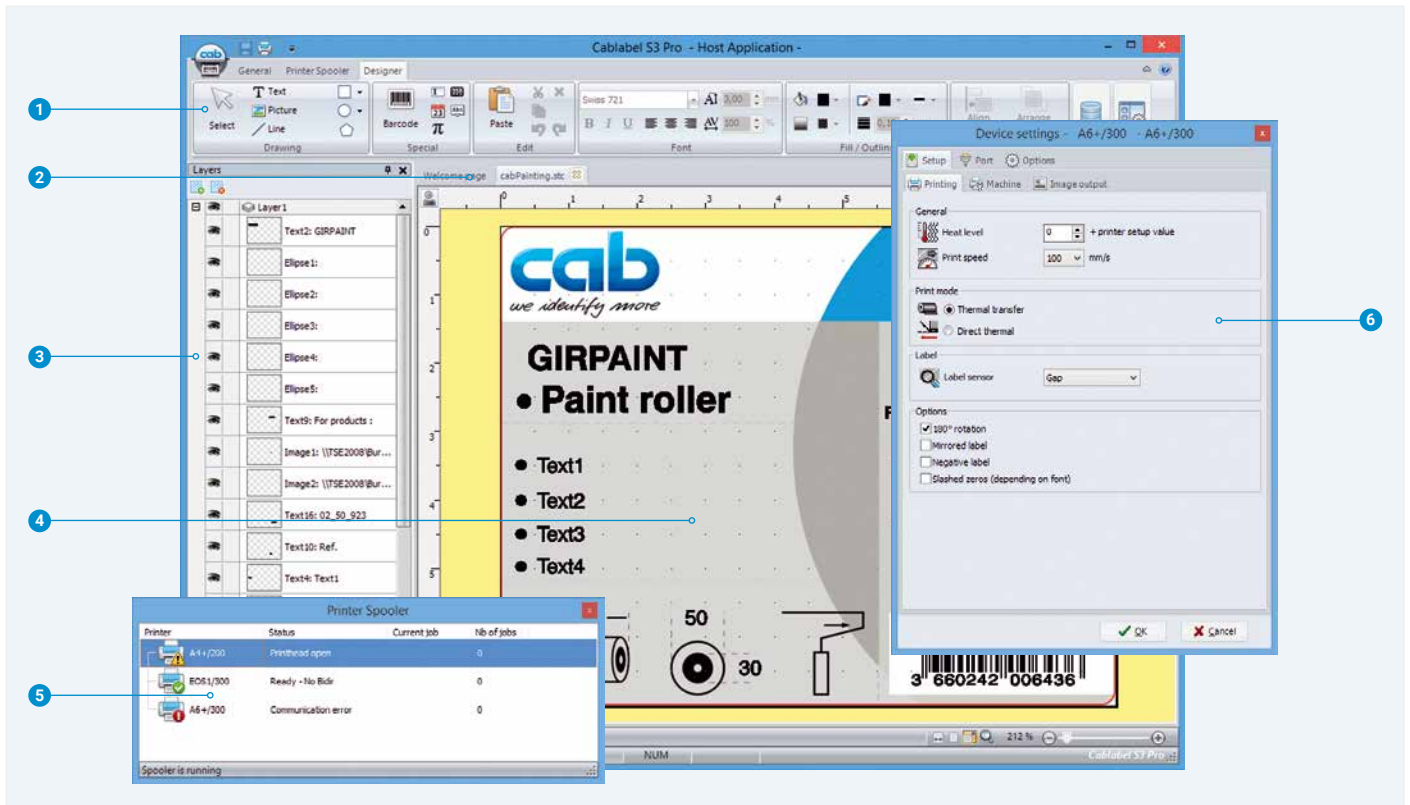

❶ Toolbar
to create different label objects

❷ Tabs
to quickly switch from one running label design to another

❸ Layers
to administrate different label objects

❹ Designer
simplifies the design and displays the label WYSIWYG

❺ Printer spooler
to monitor all print jobs and the state of the printer

❻ Drivers
for setting and the communication with devices

Printing in stand-alone operation

This operating mode is the printer's ability to select and print labels even when it is not connected connected to a host system.

The label has to be designed with a software such as cablabel S3 or by direct programming with a text editor on a PC. Label formats, texts, graphics as well as database contents are stored on a memory card, a USB memory stick or in the internal IFFS memory.

Only variable data are sent to the printer via a keyboard, a barcode scanner, scales or other host systems and/or recalled by the Database Connector from the host and printed.

Printer control

Drivers

To control the printer with a software other than cablabel S3, cab provides drivers in 32 / 64 bit for oprating systems starting from Windows Vista, Mac OS 10.6 and Linux with CUPS 1.2.

Windows[1] drivers
cab printer drivers are certified according to WHQL. They ensure optimum stability on the Windows operating system.

Mac OS X[2] drivers
cab provides CUPS-based printer drivers for Mac OS X applications.

Linux drivers
Linux drivers are CUPS-based.

Free download on **www.cab.de/en/support**

Programming

JScript
To control the printer, cab has developed the embedded programming language JScript. See manual for free download at **www.cab.de/en/programming**
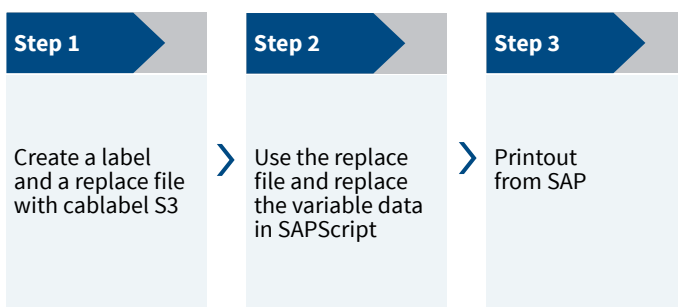

abc Basic Compiler
In addition to JScript and as an integral part of the firmware, it allows advanced printer programming before data are sent to printout. For example, external printer languages can be replaced without interfering in the current print job. Also data from other systems such as a scale, a barcode scanner or PLC can be integrated.

Integration

Printer Vendor Program
As a partner in SAP's[3] Printer Vendor Program, cab has developed a replace method to enable easy control of a cab printer via SAPScript from SAP R/3. Only variable data are sent to the printer by the host. Pictures and fonts that had priorly been stored in the local memory (IFFS, memory card, etc.) are merged.

Step 1	Step 2	Step 3
Create a label and a replace file with cablabel S3	Use the replace file and replace the variable data in SAPScript	Printout from SAP

Printer administration

Configuration in Intranet and Internet

The HTTP and FTP server integrated in the printer via standard programs like a web browser or FTP clients allows printer control and configuration, firmware updates and memory card administration. Via email or SNMP, the SNMP and SMTP client datagram sends status, warning and error messages to administrators and users. Time and date are synchronized by a time server.
Network Manager

It is possible to simultaneously manage several printers within the network. Control, configuration, firmware updates, memory card administration, data synchronization and PIN administration are supported from one single location.

Database Connector

Printers connected to a network may directly access data from a central ODBC or OLEDB-ready database and print it on a label. While printing, data can be rewritten to the database.
